The war with the Third Reich involved an unseen cloak and dagger struggle between the participants, but beyond that, an even larger and longer contest took place in the shadows. Communism gained its first major foothold in statehood with the success of the Russian Revolution at the end of World War I, a success bizarrely assisted by the massive funding provided to the revolutionaries by some Western businessmen. Armand Hammer's father Julius, for instance, gave the new Soviet Union \$50,000 in gold to back their new currency. In exchange he received asbestos mining and oil concessions, plus a pencil manufacturing monopoly in the USSR lasting until the Stalin era. Soviet Russia followed a philosophy demanding international, global revolution - which, in practice, often resembled conquest by any means available, direct or indirect. While the Soviets never hesitated to use naked force when it seemed advisable, or when compelled to it by outside attack, they made intensive use of covert operations - spying, assassination, bribery, infiltration of governments and educational systems, the deployment of agents provocateur and "agitprop" - in an effort to weaken other nations from within or possibly cause takeover by a friendly revolutionary regime. Soviet agents operated in all European countries and others, but their main efforts naturally focused on the strongest potential rivals - Germany, the United States, and Great Britain. Intelligent, persistent, and ruthless, the Soviets succeeded in recruiting a considerable number of agents,

including men from the British ruling class. Their activities enabled the Soviets to capture and execute hundreds, if not thousands, of the opponents of their regime along with numbers of British agents. The men responsible for this unprecedented leaking of life-or-death information would enter history as the Cambridge Five - though in fact, they may have been only the core of a much larger group. The Cambridge Five: The History and Legacy of the Notorious Soviet Spy Ring in Britain during World War II and the Cold War chronicles the war's most infamous spy ring and its activities. It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her.

After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard.
