The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world. Another weighty regimental

history, two volumes, 820 pages in all covering the record of twenty-two battalions in France, Flanders, Italy and Gallipoli (all of them served on the Western Front). When war broke out the regiment consisted of two Regular battalions (1st and 2nd), two Special Reserve (3rd and 4th) and four Territorial battalions (5th to 8th); the 1st Battalion went to France with 6th Division in September 1914, the 2nd Battalion came home from Malta to join the newly formed 8th Division (Regular) and went to France in November 1914. Both battalions remained in the same brigades (18th and 23rd) and divisions throughout the war. The four Territorial battalions each formed a 2nd and a 3rd line battalion; the four original battalions made up the 146th Brigade, 49th (West Riding) Division, arriving in France in April 1915, the second line battalions combined to make the 185th Brigade, 62nd (2nd West Riding) Division which arrived in France in January 1917. Kitchener's call to arms resulted in eleven Service battalions being raised, 9th to 18th (the 17th was formed as a Bantam battalion) and 21st; of these only 13th and 14th did not go on active service. The 21st Battalion became a Pioneer battalion in 4th Division and the 22nd was a Labour battalion which also went to France. This history records events in chronological order, the dates of the operations being described are shown in the margin as are the identities of the battalions involved. Volume 1 (x + 355pp with 18 maps and 15 b/w photos) covers the period from the outbreak of war to the end of 1916, the close of the Somme offensive and includes the Dardanelles campaign where the 9th Battalion was in action with the 11th (Northern) Division. On 1st July 1916, the first day of the Somme, the 10th Battalion

attacked at Fricourt and incurred the heaviest casualties of any battalion - 710, of whom 307 were killed including the CO, 2IC, adjutant and two company commanders. More than half of them are in in Fricourt New Military Cemetery which is in the No Man's Land across which they attacked and where they died. The CO (Lt Col Dickson) and his adjutant (Capt Shann) lie side by side. There is a Roll of Honour for the period covered in which the other ranks are listed alphabetically by battalions as are the Territorial battalion officers; the other officers are shown in one group in alphabetical order with the battalion number in front of the name. Although the note at the head of the officer casualty list states that the theatre in which death occurred is France and Flanders unless otherwise indicated, nonetheless 'Gallipoli' is not shown against the names of the officers of the 9th Battalion who died there, and so one is left with the wrong impression they died on the Western front.

Volume of the United States Tax Court Reports containing case abstracts and opinions of the court regarding cases between July 1, 2013 December 31, 2013. Cases in each volume are listed in the prefatory table. The United States Tax Court is a federal trial court of record established by Congress under Article I of the U.S. Constitution, section 8 providing (in part) that Congress has the power to "constitute Tribunals inferior to the Supreme Court. "The Tax Court specializes in adjudicating disputes over federal income tax, generally prior to the time at which formal tax assessments are made by the Internal Revenue Service. Though taxpayers may choose to litigate tax matters in a variety of legal settings, outside of bankruptcy, the Tax Court is the only forum in which

taxpayers may do so without having first paid the disputed tax in full. Parties who contest the imposition of a tax may also bring an action in any United States District Court, or in the United States Court of Federal Claims; however these venues require that the tax be paid first, and that the party then file a lawsuit to recover the contested amount paid (the "full payment rule")." SCHAUM ADULT PIANO COURSE includes some fundamentals for the beginning player and some performance pieces with which to apply them. Also included is a musical dictionary. The medieval poem Cursor Mundi is a biblical verse account of the history of the world, offering a chronological overview of salvation history from Creation to Doomsday. Originating in northern England around the year 1300, the poem was frequently copied in the north before appearing in a southern version in substantially altered form. Although it is a storehouse of popular medieval biblical lore and a fascinating study in the eclectic use of more than a dozen sources, the poem has until now attracted little scholarly attention. This five-part collaborative edition presents the Arundel version of the poem with variants from three others. In addition it provides a discussion of sources and analogues, detailed explanatory notes, and a bibliography. The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week. Designed to accompany the Open University course Developing Intensive Curricula: Equality and Diversity in Education, Vol 1 will appeal to research students undertaking research in the area of education, focusing on special needs. In his eighth and final annual message to Congress, Ulysses S. Grant reminded the nation that it was his "fortune or misfortune, to be called

to the office of Chief Executive without any previous political training." The electoral crisis that dominated Grant's last months in office left little room for political error. On November 7, 1876, Democrat Samuel J. Tilden won the popular vote, but Republican Rutherford B. Hayes could claim the presidency by a single electoral vote if he captured all disputed electors from Florida, Louisiana, South Carolina, and Oregon. Uncertainty gave way to deadlock as the crisis deepened. Grant's mail included a steady trickle of anonymous threats. In late January 1877, Grant signed a bill creating an electoral commission to end the dispute. Hayes won all disputed electors and succeeded Grant without incident. Out of the White House, without a settled home, the Grants spent two months visiting family and friends before embarking on their long-planned European tour. On May 17, Grant left Philadelphia aboard the steamer *Indiana*. When he arrived at Liverpool, crowds thronged the docks and streets to give him a hero's welcome, and Londoners welcomed Grant with similar enthusiasm. In July, the Grants crossed to Belgium, traveled through Germany, and summered in the Swiss Alps and the lakes of northern Italy. Back in Great Britain, they toured Scotland and northern England, then visited daughter Ellen Grant Sartoris at Warsash, the Sartoris country home near Southampton. Grant spent November in Paris, later writing "no American would stay in Paris if he found himself the only one of his countrymen there." The Grants wintered in the Mediterranean, sailing down the Italian coast to Sicily, where they spent Christmas, then to Alexandria, and a long trip up the Nile. The party toured the Holy Land, visited Constantinople and Athens, and spent a

month in Italy. After another month in Paris, the Grants were off to Holland, Germany, Scandinavia, Russia, Austria, and Switzerland, exploring the Alps again before returning to Paris in September, 1878, to ponder their next move. Abroad and out of office, Grant freely talked about the war and his presidency. Several interviews stirred controversy in America and stoked talk of a third term in 1880, despite Grant's own protestation: "I never wanted to get out of a place as much as I did to get out of the Presidency." The Grants had seen Europe. Now they faced a choice between home and a journey to distant Asia. **SCIENCE IS THE NEW ROCK 'N' ROLL!** So said Dade Ellis, Simon Grimshaw, Emerson Strange, and Thomas Walker at the dawn of a new age of enlightenment that ushered in a boom in scientific advancement. As the research supergroup World Corp., they became the most celebrated scientists of all time. They changed the world--and we loved them for it. But where did it all go wrong? And when progress is made at any and all cost, who ultimately pays the price? Collects **NOWHERE MEN #1-6** Third International Conference on Number Theory and Smarandache Problems, 23-25 March 2007, Weinan Teacher's University, China. Papers on Smarandache multi-spaces and mathematical combinatorics, Smarandache stepped functions, cube-free integers as sums of two squares, recurrences for generalized Euler numbers, the generalization of the primitive number function, the Smarandache LCM function and its mean value, a conjecture involving the F. Smarandache LCM function, a new arithmetical function and its asymptotic formula, and other similar topics. Contributors: J. Wang, A. Muktibodh, M. Selariu, X. Zhang,

Four Corners Full Contact with Self-study CD-ROM, Level 1 includes four key components of the Four Corners series: Student's Book, Workbook, Video Activity Sheets, and Self-study CD-ROM.

Your Total Solution for Math Grade 1 will delight young children with activities that teach addition and subtraction, place value, counting by fives and tens, measurement, and more. Standardized testing practice is included. Your Total Solution for Math provides lots of fun-to-do math practice for children ages 4-8. Colorful pages teach numbers, counting, sorting, sequencing, shapes, patterns, measurement, and more. Loaded with short, engaging activities, these handy workbooks are a parent's total solution for supporting math learning at home during the important early years.

After a year at boarding school, Shion Sonozaki flees the oppressive institution and secretly returns to her hometown in the mountains, telling only her twin sister Mion of her arrival. Though the Sonozaki family has kept the sisters apart to prevent conflict over who would become the next family head, Mion and Shion have remained close - enough so that Shion can easily impersonate her identical twin. When Shion encounters Satoshi Hojo in town, he is completely taken in by her "Mion" disguise. And Shion is quite taken with him... Originally published in 1960, the two volumes of Experiments in Personality report a number of experiments in psychogenetics, psychopharmacology, psychodiagnostics, psychometrics and psychodynamics, all of which formed part of the programme of research which

had been developing from the late 1940s at the Maudsley Hospital. Presenting the studies together in a book, rather than the more usual route of journal articles, was itself felt to be an experiment at the time, especially given the wide area covered. The decision was deliberate because all the studies reported formed part of a larger whole, which would have been lost if published separately. Volume I looks at psychogenetics and psychopharmacology. Surgery theory, the basis for the classification theory of manifolds, is now about forty years old. There have been some extraordinary accomplishments in that time, which have led to enormously varied interactions with algebra, analysis, and geometry. Workers in many of these areas have often lamented the lack of a single source that surveys surgery theory and its applications. Indeed, no one person could write such a survey. The sixtieth birthday of C. T. C. Wall, one of the leaders of the founding generation of surgery theory, provided an opportunity to rectify the situation and produce a comprehensive book on the subject. Experts have written state-of-the-art reports that will be of broad interest to all those interested in topology, not only graduate students and mathematicians, but mathematical physicists as well. Contributors include J. Milnor, S. Novikov, W. Browder, T. Lance, E. Brown, M. Kreck, J. Klein, M. Davis, J. Davis, I. Hambleton, L. Taylor, C. Stark, E. Pedersen, W. Mio, J. Levine, K. Orr, J. Roe, J. Milgram, and C. Thomas. This book presents a comprehensive and systematic survey on (1-3)-B-glucans. Glucans with the (1-3)-B-glucosidic linkage as a major feature, are present in most higher plants and many lower plants and microorganisms. They may occur as major

structural or storage components or be formed at very specific sites in response to particular developmental events or stimuli. In many cases their functional role is a mystery, in others it is well established. Their distribution and physiological involvement indicates that they are important to fields such as agriculture and biotechnology, and may also have an impact in medicine, through their role in immunology and cancer therapy. Considers reorganization plans to reorganize SEC and FCC.
